INDUSTRIAL - CIVIL - NAVAL: **one solution for all the applications!**

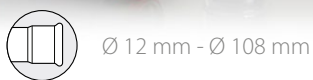

STAINLESS STEEL AISI 316L

Eurotubi Pressfitting System in stainless steel is the ideal solution for installing drinking water systems, since AISI 316L stainless steel guarantees high hygienic properties and corrosion resistance. Reliable and high-quality components make it suitable also for heating, cooling, compressed air and fire-extinguishing systems in the civil, industrial and marine sectors.

Eurotubi Pressfitting System has been certified by numerous national and international authorities. In particular, the demanding quality requirements of the German approval DVGW W534 for drinkable water and VdS for sprinkler systems have been fully satisfied.

CARBON STEEL

Eurotubi Pressfitting System in carbon steel is indicated for use in various types of civil and industrial installations where the stainless steel pipe work is not required. It combines the unparalleled reliability of pressfitting technology with very low costs.

Typical applications are:

- closed-circuit water heating and cooling systems
- compressed air and inert gas systems
- sprinkler systems

The system is certified in accordance with the norms RISE for the Scandinavian countries, CSTB/QB for French-speaking countries and german VdS for sprinkler systems.

STAINLESS STEEL AISI 316L GAS

Eurotubi Pressfitting System has been also approved in several European countries for use in gas distribution systems, through external above-ground pipes, running inside or outside of the buildings. It offers the highest seal indices and is certified according to German DVGW G 5614 technical specifications. It can be used for all types of combustible gas, both natural and liquid, included in the DVGW G260 reference standard.

The o-ring gaskets are made of yellow HNBR and therefore are compatible with any of the combustible gas used and are resistant to aging and heat.

Max. pressure: 5 bar; min. and max. temperature: -20 /+70 °C.

POWER OF EXPERIENCE

Founded in **1953**, grown and known in the pipe bending processing field, over the past 20 years **Eurotubi Europa** has specialized in the production of **Eurotubi Pressfitting System**. Being always oriented towards **innovation** and **specialization**, the Company has experienced a steady growth, becoming one of the major European manufacturers, internationally recognized thanks to the excellent quality of its pressfittings.

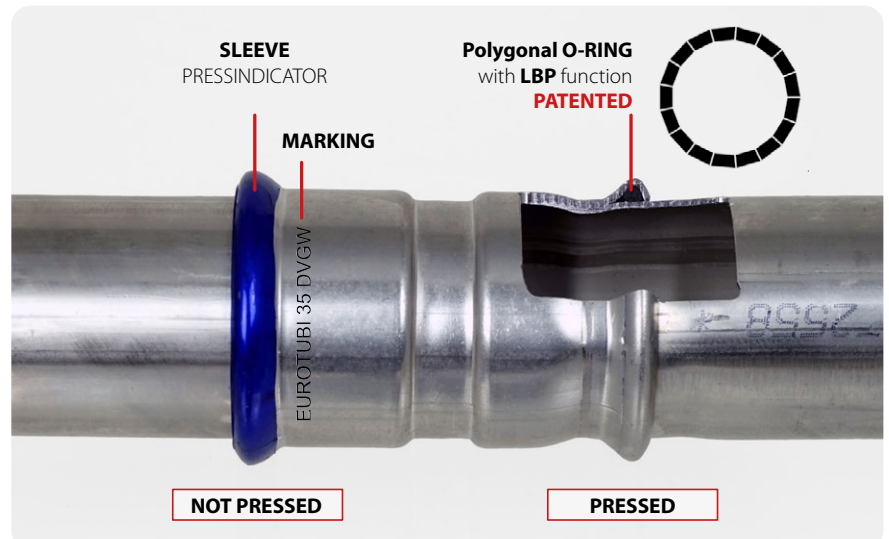

CUSTOMER SATISFACTION

4,54 ★★★★★

Filled in by 20 top clients, representing 80% of the pressfitting turnover.

PRESSFITTING ADVANTAGES

- EASY** ✓ Very simple assembling technique
- FAST** ✓ Quick installation
- ECONOMIC** ✓ Reduction of installation times and costs
- CLEAN** ✓ No welding or threading required
- HYGIENIC** ✓ Maximum hygiene
- RESISTANT** ✓ Guaranteed to last over time
- UNATTACKABLE** ✓ High resistance to corrosion
- NICE-LOOKING** ✓ Also suitable for surface installations
- ECOLOGICAL** ✓ 100% recyclable material
